By bunching hits with errors in two innings after two men were out, the Athletics defeated the North Enders at the Casino park yesterday afternoon by a score of 5 to 3. The game was fast and exciting throughout and the six hundred fans on hand found plenty of opportunity to give vent to their holiday enthusiasm. "June" Davis was pitted against Tom Reynolds and as both men were in fine form the game was a pitchers' duel throughout. Davis yielded more hits than Reynolds, but he was almost invincible with men on bases. He received better support than Reynolds, the Athletics playing a fine fielding game. Davis won his own game in the eighth with an infield single.

North End broke the ice in the opening of the third, passes to Powell and Shaven, singles by Maloney and Bryan and Tate Hill's infield out netting two runs.

After Mountcastle and Davis were out in the same round, Johnson scratched a single and Tate Hill made a wide throw of Roaten's grounder. Land and Read singled, three runs counting. North End tied the score in the seventh on doubles by Maloney and Hill. The Athletics won in the eighth after Rice and Mountcastle had fanned. Patton opened the round with a single, stole second and went to third on Hughes' error on Stuart's bunt. Davis scratched an infield single, scoring Patton and Stuart.

Running catches by Powell, Read and Richardson were features.

NORTH ENDERS WIN PUNK EXHIBITION BALL GAME

Athletics Make Many Bingles and League Leaders Win as They Please—New Men Make Good.

North End won a punk exhibition game from the Athletics at the Casino park yesterday morning by a score of 7 to 3. Both teams fielded miserably and the crowd of 400 fans in at the start had dwindled to a mere handful before the ninth round was finished.

Eaken, a new man, was on the firing line for the North Enders, and, barring a slight wildness, he pitched a good game. Speakman started out for the Athletics, but was wild and Ned Clarke replaced him. Clarke was strong to the finish.

Tate Hill made his debut at short for the North Enders and played a superb game. His running, one-handed stop and quick throw of a fast grounder to the right of second base in the second was a feature. Stuart also fielded well at short. Don Bryan led with the stick, walloping out three singles in five times up. Each team pulled off one double play. Johnson's rotten fielding was a feature.

SHELL DAMAGES TARGET

Low Shot Puts Little Battle Practice Craft Out of Commission.

IDEAL DAY FOR ROUGH WORK

Twenty Knot Northeast Breeze Kicks Up Sea on Drill Grounds—Missouri Joins Fleet and Takes Place on Range—Busy Labor Day.

The Atlantic battleship and cruiser fleet had highly favorable conditions for their rough water practice work as a northeast wind was blowing 20 miles an hour, unfortunately one of the target boats, having been penetrated by shells from the big guns of the ships, became waterlogged and had to be brought in for repairs. The little craft was completely submerged, with nothing but the improvised masts projecting above water.

The day was an ideal one and the ships continued their maneuvers and target work under radiant skies with a temperature down to 65. Though all government work on land was suspended for the "Labor Day" celebration, the fifteen thousand men making up the crews of the twenty ships now constituting the Schroeder fleet were hard at work.

The battleship Missouri, which arrived from Boston Saturday proceeded to sea early today, joining the other ships on the drill grounds and immediately taking her place on the stationary target range.

WOULD OUST REYNOLDS

Rumor Says Politicians Desire to Make Miltstead Police Chief.

SERGEANT DISCREDITS THE REPORT

Plan is, Says the Story, to Make Present Head of Department Detective in Order to Arrange "Berth" for Retiring Official.

According to rumors that have been in circulation recently and which began to be discussed generally yesterday, certain of the local politicians who are members of the so-called city Democratic "ring," are contemplating a move to oust Chief of Police John W. Reynolds from office and have E. W. Miltstead, who must surrender his office of city sergeant on January 1, appointed at the head of the police department.

Chief Reynolds is to be "let down" lightly, says the report, the plan being to appoint him detective sergeant, a position which he filled with single ability for many years. Incidentally, it is rumored that the city council will be asked to make the salary of the detective sergeant \$1,500 a year, the same that the chief is now paid. Whether or not the men behind this scheme propose to ask the council to increase the salary of chief is not known at this time.

When asked about these rumors by a Daily Press reporter yesterday afternoon, City Sergeant Miltstead said that they had their origin among certain members of the police force. He would not say who they were and he apparently sought to leave the report or with the impression that there was little truth in the rumors.

Chief Reynolds said yesterday that Mr. Miltstead had told him that he had told some of the policemen in a jocular way that he expected to be wearing the uniform of chief before very long. The chief went on to say that he had heard the rumors about the proposed change, but had paid little or no attention to them.

Mr. C. Aylett Ashby will resign from the board of police commissioners this month and Mayor Jones will be called upon to appoint his successor. Robert W. Perkins, for many years chairman of the Democratic city committee, is mentioned as Mr. Ashby's successor. Mr. W. B. Colonna also has been mentioned in connection with the appointment.

No Clinkers Burns Less Coal—Gives More Heat

Clinkers are not only troublesome, but very expensive. They clog and kill a fire, so that the coal only half burns, and very little heat is produced. The one sure way to be proof against clinkers, and to have steady, warm comfort in every room in your house, every hour in all kinds of weather, is to install a

MODEL Heating System

Adapted to steam or hot water. Under the boiler is a wonderful grate that is clinker-proof, trouble-proof, keeps the fire always clear at the bottom, making the coal burn to fine white ashes.

THE LEDOM RANGE
Seize coal by utilizing it. Instantly regulated for greater or less heat as required, by the most improved system of drafts and dampers. Keeps the hot water tank always full of piping hot water. Sustains a remarkably steady oven for baking, which is easily regulated to the desired degree of heat.
